

DaaS

Device as a Service

Enjoy the latest technology for a monthly subscription

We believe that technology should be accessible to all businesses, regardless of their size or budget.

With our DaaS solutions, businesses can enjoy **cost-effective** and **flexible technology** solutions tailored to your specific needs. We are committed to helping our clients achieve their business goals through innovative technology solutions, outstanding customer service, and unparalleled value!

Our comprehensive DaaS programme includes device procurement, configuration, deployment, support, and end-of-life disposal. The subscription fee can also include cloud solutions, software licenses, security updates, remote helpdesk support and other related services.

If you are looking to reduce the upfront costs that are associated with purchasing and maintaining devices, then DaaS could be the ideal solution. Leasing your technology devices is perfect for those for businesses that need to scale their device inventory up or down quickly.

BUSINESS BENEFITS

Cost Savings: access the latest devices without the upfront capital expenditure of investing in expensive hardware.

Predictable Costs: budget and forecast device costs with greater accuracy, aiding financial planning.

Scalability: quickly add or remove devices without the need for complex procurement processes, which can be time-consuming and expensive.

Flexibility: customise the devices, configurations, software, and support services according to your requirements.

Device Management: relieve the burden of managing and maintaining devices, allowing you to focus on your core business operations.

Security and Compliance: we protect devices and data from unauthorised access and breaches ensuring your devices are compliant with relevant regulations and industry standards.

Upgrade Your Technology Upgrade your Business

Have you considered Device as a Service as part of your IT Solution?

DaaS ensures that your businesses always has a clear and defined technology roadmap for the device subscription whilst guaranteeing:

- **Access to the latest technology**, which means increased productivity and efficiency.
- **Peace of mind** that comes with knowing your devices are always up-to-date and secure - reducing the risk of security breaches or data loss.
- **A predictable monthly fee** – allowing for easier budgeting and cost control, as there are no unexpected expenses related to device maintenance or replacement.

We work with our clients to develop customised solutions that align with business objectives, budget, and needs.

Our team of experts is dedicated to delivering exceptional customer service, ensuring that our clients have access to the technology they need to thrive in today's competitive landscape.
